

# math wrds

## Across

2. two or more quantities already combined by another operation  
 4. group of quantities connected by operators that gives the same result  
 8. the result of adding two or more numbers  
 9. a number used to multiply a variable  
 11. are numbers you can multiply together to get another number  
 12. a number that can only be divided evenly by one and itself  
 13. to find an answer to

14. the result of subtracting one number from another  
 17. shows the relative sizes of two or more values  
 18. involving the condition that a group of quantities connected by operators gives the same result whatever the order of quantities involved  
 19. the product of a number multiplied by 3 each times  
 20. a statement that the values of two math problems are equal

## Down

1. is the number on the opposite side of zero on the number line

3. is a single number or variable, or numbers and variables multiplied together  
 5. the answer after you divide one number by another  
 6. number that can be divided evenly by numbers other than 1 and itself  
 7. the distance around a two-dimensional shape  
 10. a number that can be made by dividing two integers  
 15. a math relationship or rule expressed in symbols  
 16. the answer when two or more numbers are multiplied together
