

# muscles

## Across

- 4. Multiple nuclei
- 10. Movement of bones at joints
- 13. Contracts and relaxes relatively rapidly
- 14. Diameter of 10-100um
- 15. Has a single nucleus
- 17. 30-200 um

- 18. Is the main muscles

## Down

- 1. Striations are absent
- 2. Well developed tubule system
- 3. Maintenance of posture
- 5. Mode of control
- 6. Lacks transverse tubules

- 7. A bundle of fascicles
- 8. Transverse tubule system is well developed
- 9. Up to 50-100um
- 11. A bundle of muscle fibers within a muscle
- 12. Attach to bones, and skin of face
- 16. Skeletal major location
