

# plant and animal cells

## Across

2. Breaks down larger food molecules into smaller molecules

4. Clear, thick and jellylike material (cytosol)

7. the outer part of the cells

8. Break down sugar (glucose) molecules to release energy

9. Small bodies free or attached to ER

10. Carries materials through cells

## Down

1. control movement in and out of the cell

3. Surrounds the nucleus

5. Store food, water, metabolic & toxic wastes

6. controls cells activities

## Word Bank

Nucleus

Vacuole

cell wall

Cell membrane

Ribosome

Nuclear membrane

Endoplasmic reticulum

Mitochondrion

Cytoplasm

Lysosome
