

# plate tectonics

**Across**

- 5. what is the continents that drifted together
- 6. heat can also be transferred by the movement
- 7. what transfer of energy through space?
- 8. what is ocean floor sinks beneath a deep ocean trench
- 9. what is a dense ball of solid metal

- 10. what is a layer that molten metal that surrounds the inner core?

**Down**

- 1. what is the continents slowly moved over Earths surface?
- 2. what is the oceans floor that plunges into deep under water canyons
- 3. what is the under water mountain range
- 4. what is below the boundary is the solid material
