

# rock types

**Across**

- 3. movement of sediments
- 8. when magma is at the Earth's surface
- 10. formed from magma
- 13. formed when mineral rich water evaporates
- 16. formed by slowly cooling magma
- 18. Grains scattered at random
- 19. made from sediments

20. when sediments turn into rocks

**Down**

- 1. formed from once living things
- 2. an aggregate or mixture of one or more minerals
- 4. formed from rock particles
- 5. process of wearing down rocks
- 6. forms an igneous rocks

7. the size, shape, and orientation in rocks

- 9. pushing up of Earth's crust
- 11. process when eroded rock are moved
- 12. formed by quickly cooled magma
- 14. Grains lined up in layers
- 15. made with heat and pressure
- 17. process when sediments are reduced in size
