

rocks

Across

- 2. When rocks become solid
- 4. When rocks break down from water wind and more
- 9. When this cools it forms igneous rock
- 10. When rocks are squeezed together to form a new rock
- 12. What our earth is made out of and basically what this is about
- 13. What everything including rocks are made of
- 14. The layers of sedimentary rock

- 15. When rocks become liquid
- 17. Rocks naturally moving from one place to another
- 18. A type of rock made from heat and pressure
- 19. A cycle showing how rocks are constantly changing
- 20. A type of rock made from cooled and hardened lava

Down

- 1. A type of rock made from sediments
- 3. Mountains that disperse lava

- 5. When rocks are naturally dropped after erosion
- 6. A rock made from heat pressure and sandstone
- 7. What sedimentary rocks are made out of
- 8. An other way to say that rocks cool
- 11. The home of our giant rock we call earth
- 16. When rocks are pushed down together to form new rocks
