

the genetics of nature V's nurture

Across

4. certain gene that carries two different alleles
 6. The expression of the trait
 9. A genetically determined characteristic
 12. What is paired with thymine in a double stranded DNA
 13. Different variations of a gene
 14. you get this from either one or both parents
 16. What is paired with Guanine in a double Stranded DNA
 19. YY/Yy

20. a colourless, odourless, highly flammable gas
 21. The pair of Alleles for the trait
 22. What is the name of DNA
- ## Down
1. A group of atoms bonded together
 2. this holds your genes
 3. What is paired with adenine in a double stranded DNA
 5. yy
 7. A feature or quality belonging typically to a person

8. A complex organic substance present in living cells
 10. What is paired with Cytosine in a double Stranded DNA
 11. characteristics being passed down from generation
 15. combining two different elements
 17. what is inside a chromosome?
 18. matching alleles which are the two genes that control a particular trait
