

the origin of the universe

Across

3. The name of the theory
 5. a small, icy object that orbits the sun and has a long "tail" of gas
 6. it is the collection of stars and planets that are held together by gravity.
 7. Any of the heavenly bodies, except the moon, appearing as fixed luminous points in the sky at night

8. a visible collection of particles of water or ice suspended in the air, usually at an elevation above the earth's surface
 9. a fluid (such as air) that has neither independent shape nor volume but tends to expand indefinitely
 10. an act of exploding
 13. having a high temperature
 14. a colourless, transparent, odourless liquid that forms the seas, lakes, rivers, and rain and is the basis of the fluids of living

Down

1. not clean or pure
 2. the planet on which we live
 4. the sun together with all the planets and other bodies that revolve around it
 11. the quality that distinguishes a vital and functional being from a dead body
 12. it is all the animals, plants, and other things in the world that are not made by people
