

Name: _____

Date: _____

vocabulary word hunt

Across

- 3. henry's law is**
- 4. surface tension makes water**
- 5. what pressure created as a molecule can escape from the liquid phase to the gaseous phase**
- 10. what is a type of solution**
- 11. colloid is a type of**
- 14. to Calculate the number of grams of solute required to make the following solution is a**
- 15. the medium that is dissolving another substance is**

- 16. water molecule has a**
- 17. it starts to contract causing mass to decrease while volume remains constant that is**
- 18. what do you call heat at a specific temperature**
- 19. what inward force or pull that can tend to minimize the surface area of the liquid**
- 20. Molarity and Volume are indirectly related is**

Down

- 1. what is a type of solutes**
- 2. extensive bonding requires large amount of heat to disrupt that is called**

- 6. a polar molecule can be**
- 7. Non-Electrolytes is a type of**
- 8. the greater the — the more spherical the drop**
- 9. the substance that is being dissolved is**
- 12. when it comes to water molecule the molecular geometry is**
- 13. homogenous mixture is a**
