# water cycle

## Across

6. water found underground in the cracks and spaces in soil, sand and rock
7. the process by which water is transferred from the land to the atmosphere by evaporation from the soil and other surfaces and by transpiration from plants.
8. downward movement of water from soil surface, into the soil mass through the pores of soil
9. the process of a gas changing into a liquid
10. the water that flows on the ground

## Down

1. process of snow and ice changing into water vapor in the air without first melting into water
2. the cycle of processes by which water circulates between the earth's oceans, atmosphere, and land, involving precipitation as rain and snow, drainage in streams and rivers, and return to the atmosphere by evaporation and transpiration
3. a form of water such as rain, snow, hail, or sleet that falls to the ground
4. water evaporating from a plant
5. the process of turning from liquid into vapor
