

weather project

Across

- 2. an instrument used to measure wind speed
- 3. the amount of water vapor in the air
- 4. small, intense weather systems that produce strong winds, heavy rain, lightning, and thunder
- 6. an electric discharge that occurs between a positively charged area and a negatively charged area

- 8. a tool used to measure temperature
- 12. the condition of the atmosphere at a particular time
- 13. the sound caused by the rapid expansion of air along an electrical strike
- 14. a collection of millions of water droplets or ice crystals
- 15. any form of water

Down

- 1. the change of state from a gas to liquid

- 5. an instrument used to measure air pressure
- 7. a large body of air where temperature and moisture content are similar throughout
- 9. a large, rotating tropical weather system that has wind speeds of at least 120km/h
- 10. small, spinning column of air
- 11. the boundary between air mass of different densities
